

Pcounter Europe

# WEB REPORT 4 + GDPR

Make your printing GDPR compliant with the new Pcounter Web Report

# MAKE PRINTING GDPR COMPLIANT FAST AND EASY

GDPR is the most significant development in data protection that Europe has seen over the past twenty years.

## **New demands for user print tracking and management**

GDPR compliance requires new ways of working with data. Usernames, emails, document names and much more needs management and intelligence.

With thousands of print jobs and users registered, how time demanding would it be to make sure that all personal information is removed or archived correctly?

You need the ability to prepare the data for GDPR already when its produced by the user.

This is what the Pcounter Web Report GDPR is all about. Make sure printing complies with the requirements.

## **The 48 hour deadline ...**

Documentation that personal data has been removed, has to be available within 48 hours from the request "I want to be forgotten" is placed. This requires the needed functionality to easily document anything and ensure the right to be forgotten is automated.

## **Education is not enough.**

## **Actions are needed**

### **Pcounter Web Report 4 GDPR Module**

#### Features

End user portal, GDPR Privacy Statements and Indication of which and how personal data is processed, retention time, information about the Data Protection Officer, modify, erase or transfer data.

# Pcounter Web Report 4 GDPR

## End user portal

GDPR Privacy Statements and Indication of which and how personal data is processed, retention time, information about the Data Protection Officer, modify, erase or transfer data.

## Right to be forgotten

Option to anonymize User name on any reports. Securing and limiting access to the original Pcounter.log files on disk via reversible encryption.

## Time limits
